

Fiddler/Alden Hot Tub

When you arrive, the hot tub should be secured by two straps, at least one of which should be locked. Before you depart, you must re-strap and lock it.

You need to add chlorine to the hot tub **each time** you use it. (If you don't use the tub, don't worry about it.) The chlorine and the key is in the garage on a shelf near the door to the hot tub. Follow the procedure below.

Absolutely NO glass in or around the hot tub!!
Always shower before getting in!

Leave the tub at 103°. Make sure you turn lights and jets off when you're done. Close the cover, **latch the two plastic tabs** at the corners, and **lock** it. Instructions for locking the straps are on a separate sheet posted on the door.

1. Remove the filter cover, add 1-2 tbsp for each person who used the tub (approximate is fine, no need to measure) , and replace the cover.
2. On the controller, go to the home screen by pressing the home button (if you're not already there)
3. Go to the Clean Cycle.
4. Press Start.
5. You can close the big cover now. Be sure to latch it closed with the plastic clips at the corners.

It will run 10 minutes and then turn itself off.
