

## Fiddler / Alden Interior Door Lock instructions

The door from the garage into the house is opened by electronic code. The keypad is normally dark (1). Touch the keypad with one finger and it will light up (2). (You may need to touch it more than once, but it will light up.) Enter your code followed by #. The door should open. It will remain unlocked for 15 minutes, then relocks automatically.

If you still can't get in, call Jerry or Melissa. We can open the door remotely.
